## Awards & Reviews

**Make** Magazine's editors called the UP Plus  
*"A clear winner" and "Easy to use, with feature-rich software and impressive print quality."*

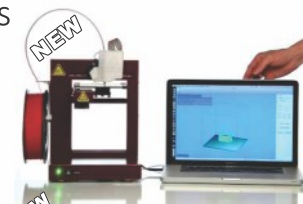

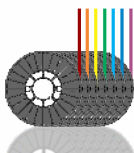

**CNET** editor *"The most approachable model we've reviewed, and we'd recommend it to anyone serious about getting started with 3D printing."*

# Choose a Smart 3D Printer that ticks all the boxes

UP+2

-  The **New UP Plus 2** is the only 3D Printer that can automatically calibrate itself; by setting the platform height and levelling the platform automatically.
-  **UP 3D Printers** create dimensionally accurate and super strong parts. Good enough for you to fix your dish-washer with!
-  **Print materials** Choose from an ever expanding selection of vibrant colours and different materials like ABS-PC, ABS, PLA and experimental materials like Nylon, Rubber, Wood etc
-  **Open Consumable:** The UP 3D Printers use an open roll of filament, so you save on costs and have a choice on what you use
-  **Longest warranty:** The UP 3D Printers have a 12 month warranty with an option for 24 month warranty. We believe in our product!
-  **Hundreds and thousands:** Choose from over 100,000 free designs from [www.thingiverse.com](http://www.thingiverse.com) or simply design your own models with [tinkercad.com](http://tinkercad.com), Sketchup or your favourite 3D CAD
-  **Smart Support:** The only 3D Printer in it's class that doesn't require multiple and complex nozzles. The UP prints it's support in the same material, just in a lower density so it's easy to break away. That's clever stuff!
-  **Need a larger 3D Print** You can easily print large models with an UP 3D Printer. Simply print in separate parts, then glue together
-  **Don't just take our word for it.** The UP Plus was awarded **"Best Overall 3D Printer"** and **"Best in Class"** by Make Magazine as well as several glowing reviews by industry experts
